

TO-ON 株式会社 東音企画

TO-ON KIKAKU Company, 1-15-1 5F, Sugamo, Toshima-ku, Tokyo 〒170-0002, Japan TEL: +81-3-3944-1581

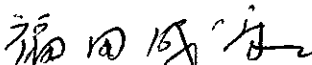

To whom it may concern,

Mr.Archer Xirui Yang joined TO-ON KIKAKU in Tokyo, Japan on Nov. 9th, 2015 for a 3-month internship which is selected by both our company and AIESEC in the University of Tokyo. During this time, Mr.Yang would be involved in web development and mobile application development. TO-ON KIKAKU dedicates to piano education and event organizing, which derives from primary Piano Teachers' National Association of Japan since 1970 (Now PTNA has become an NPO). Mr.Yang and another young Norwegian engineer are now working independently on developing our IT system of piano education, Lesson Time Manager, its mobile application version, and Lesson Time Management System.

So far, Mr.Yang has fully demonstrated his fluent English speaking communication skill, quick adaption of living abroad, pressure handling, critical thinking, cooperative working and versatility of programming language and developing tools, due to the considerable fact of his first time to come to Japan and live abroad. Although sometimes he would be a little bit nervous at the beginning which restrained his performance in TOEFL speaking iBT, he communicates very well here with our international colleagues, his AIESEC friends in the University of Tokyo and his 6 European roommates in the share house.

He has strong will of challenging and great passion of working and studying. In the first month, he quickly understood the architecture and mechanic of our IT system, and succeeded in several bug fixing. The second day here he overrode the chatting module into asynchronous instant messaging like Facebook Messenger using AJAX, which accelerates chatting significantly. Then he was obliged to use Swift for IOS programming, which is completely new to him, but he finished reading of Apple's official documents in the following two weeks when he also needed to prepare his portfolio for school applications after work. He translated website into his native Chinese, and designed business email template in pretty HTML and CSS. In the second month, he launched Lesson Time Management System by himself using bootstrap and Slim MVC framework, and visualized data in line charts and tree graphs vividly, which enhanced the efficiency of server management significantly. In the third month, he moved onto Ionic HTML5 mobile application development, in which he started developing on devices from the first day he undertook, giving the fact of his previous inexperience of mobile development.

From his first day on, he was open minded and friendly with us. Due to his outgoing and committed working attitude and behavior, he became well respected and accepted by his colleagues in the office. Therefore, we would like to specifically highlight Mr.Yang's ability to integrate himself both into a foreign country and a new company or university.

Date Jan. 21, 2016

Supervisor (CEO of TO-ON KIKAKU Company and the Piano Teachers' National Association of Japan)
